Full stack web developer with strong graphic design experience seeks to build responsive web apps that solve complex problems. Recently earned a certificate in full stack development from the University Coding, with newly developed skills in JavaScript, CSS, React.js, web scraping. Known as an innovative problem solver passionate about developing apps, with a focus on mobile-first design and development. With each project, my goal is to provide simple solutions to complex problems that utilize the entirety of the tools at my disposal. I worked with a team of three others to develop a MERN stack app that lets users find local artists in their area and add them to their Spotify playlists. I'm excited to leverage my skills as part of a fast-paced, quality-driven team to build better experiences on the web.
